Juki Introduces Feeder Refurbishment Program

MORRISVILLE, NC — June 2009 — Juki Corporation, a world-leading provider of automated assembly products and systems, announces that, in a continuing effort to offer the Lowest Cost of Ownership to its customers, it has started a *Feeder Refurbishment Program* designed to inspect, repair and calibrate existing feeders at minimal cost and quick turn around for our customers.

As part of this program the company also will offer fully refurbished Juki feeders for sale at a very competitive market price.

Top feeder performance is essential to running production at peak efficiency. Properly maintained feeders will improve line performance and reduce changeover time by:

- increasing the capability to gang pick parts
- reducing the number of component mispicks
- eliminating the need to manually teach feeder pick positions
- correcting feeder advancement problems.

Properly maintained feeders are key to efficient production

As part of the program, a certified Juki technician will inspect all feeders. Any parts deemed in need of replacement or repair will be replaced by new Juki parts. Finally, feeders will be calibrated within Juki's specification using the latest feeder calibration equipment.

For more information about this program, contact Juki at **1-800-938-2209 ext. 153** or e-mail jukifeederdepot@jas-smt.com.

###

Juki Corporation's experience as the market leader in industrial sewing machines was the stepping-stone for the entry into the printed circuit board assembly market in 1987. Since then, Juki has delivered more than 21,000 automated assembly systems worldwide and is currently shipping an average of 200 assembly machines per month. This extraordinary achievement makes Juki one of the world's leading providers of automated assembly products and systems. In addition to its core technologies, Juki's Electronic Assembly and Test Systems Division develops and manufactures advanced electronic systems and computer software for data entry, mail processing and other electronic equipment.

With the purchase of Zevatech's assets in November 1999, Juki Automation Systems now brings Juki's reputation for top quality and reliable service also to the North and South American and the European electronics assembly markets. Juki recognizes the challenges of the new century and is prepared to respond to the globalization of electronic manufacturing. With a sophisticated knowledge base, advanced technologies and a high commitment to its customers, Juki is poised for continued growth in the 21st century.
