Juki Feeder Refurbishment Program

In a continuing effort to offer the Lowest Cost of Ownership to our customers, Juki has started a *Feeder Refurbishment Program* designed to inspect, repair and calibrate existing feeders at minimal cost and quick turn around for our customers. As part of this program we will also offer fully refurbished Juki feeders for sale at a very competitive market price.

Top feeder performance is essential to running production at peak efficiency. Properly maintained feeders will improve the performance of your line and reduce change-over time by:

- increasing the capability to gang pick parts
- reducing the number of component mispicks
- eliminating the need to manually teach feeder pick positions
- correcting feeder advancement problems

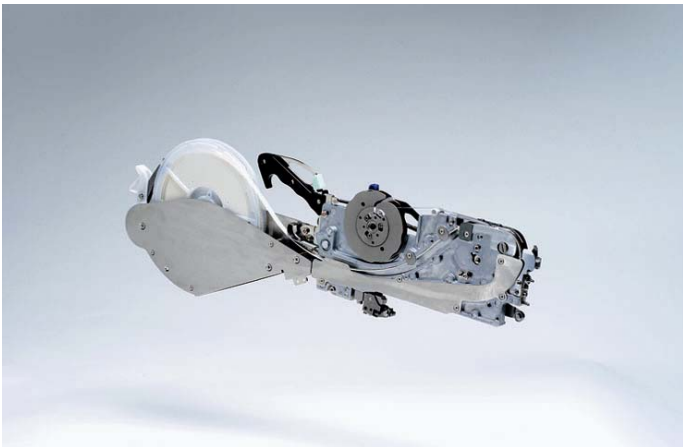

Properly maintained feeders a key to efficient production

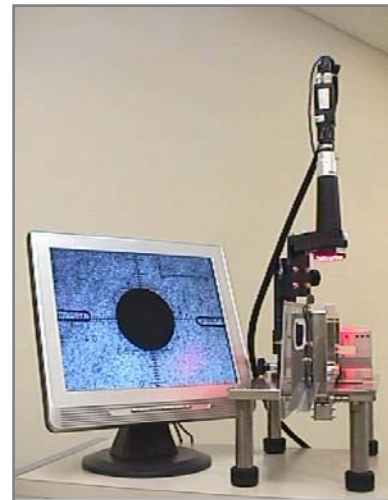

Your feeders will be inspected by certified and trained Juki technicians. Any parts deemed in need of replacement or repair will be replaced by new Juki parts. Finally, feeders will be calibrated within Juki's specification using the latest feeder calibration equipment.

So let the experts at Juki maintain your feeders so that you can concentrate on exceeding your customer's expectations. You will see your quality and yield improve immediately.

Listed below are the terms and conditions of this program along with the pricing structure.

Juki 8mm CF Style Tape Feeder

Juki Calibration Jig

FEEDER DISPOSITION

All feeders will be inspected, repaired, calibrated and then certified to operate within factory specifications. Feeders sent to the Juki Feeder Repair Depot will be subject to an Inspection Fee / Handling Fee. If a feeder is deemed to be damaged beyond repair, only the Inspection Fee / Handling Fee will be charged. If a feeder is deemed repairable, the Inspection Fee / Handling Fee will be included in the Repair Charge. Repair / replacement of RFID tags are not included and will be quoted on an as needed basis.

NOTE: A feeder is deemed damaged beyond repair if the frame body is warped, broken or excessively worn.

Feeders will be tracked by serial number. All feeders will be labeled with a calibration sticker and date. Each certified feeder will have a 90 day warranty. This program only applies to genuine Juki feeders. Any feeder determined to be counterfeit will be subject to an inspection/handling fee and returned to the customer.

SHIPPING PROCEDURE

A work order number is required with every feeder shipment to the Juki Feeder Repair Depot. To get a work order number please contact Juki at 1-800-938-2209 ext. 105 or send an email to jukifeederdepot@jas-smt.com. Shipping instructions will be supplied with the work order number. It is very important that all feeders shipped to the Juki Feeder Repair Depot are clearly marked with the assigned work order number. Shipping charges to and from the Juki Feeder Depot are the sole responsibility of each customer. Once the feeders have been certified, they will be returned to the customer via the customer's preferred shipping method.
